Java

```java
class Solution {
    public int minimumSubarrayLength(int[] nums, int k) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @param {number} k
 * @return {number}
 */
var minimumSubarrayLength = function(nums, k) {

};
```

TypeScript

```typescript
function minimumSubarrayLength(nums: number[], k: number): number {

};
```

C++

```cpp
class Solution {
```

```
public:
    int minimumSubarrayLength(vector<int>& nums, int k) {

    }
};
```

C#

```
public class Solution {
    public int MinimumSubarrayLength(int[] nums, int k) {

    }
}
```
